

CIS 3760 – Software Engineering
Instructor: Prof. S. Scott
Individual Accountability Report (IAR) Template

Note. Refer to the Project Manual for detailed instructions for IAR submissions.

Individual Accountability Report (IAR) Template

The following questions **MUST** be included and answered completely for each submitted IAR.

IAR must be submitted one of the following file formats: text or PDF.

Q1. Student Name: Arash Esfandiari

Q2. Student ID: 1019706

Q3. Associated Team Deliverable: Overview of current and proposed system, some user stories

Q4. Section#, Team #: 2, 2

Q5. What were the main technical or methodological concepts and/or skills that were required to complete this team deliverable? (bulleted list is preferred):

- Having an understanding of agile software development
- The ability to read and analyze code
- Wrapping your head around components of a mobile application

Q6. What was your existing level of experience with these topics/skills before your team began working on this deliverable? (1-2 sentences):

I had no practical previous experience with mobile applications or software development.

Q7. Comment on your individual academic, methodological, or technical learning during this deliverable, and what additional learning may be needed to understand or be more competent with these topics in the future?

The opportunity to implement what we have been taught in this course and previous courses is extremely helpful in order to actually learn and understand why these methods are being used and benefits they have. Practice and learning the details is essential to be more competent.

Q8. What specific contributions did you make to this team deliverable? This should include technical or project management contributions.

I was involved in the finding the app we are working on (sent it to our group chat and as a team we decided to use it) and the thinking process of how this app can be improved. I analyzed the current system and wrote down an overview of current. I collaborated with Nick and Danish

to come up with features to add to our proposed systems and wrote an overview for it. I also made a list of requirements so that we can extract our user stories from them more easily.

Q9. With whom did you collaborate for any of the above contributions (be specific)?

I had some individual work done, and collaborated with Nick, Danish, and Jacob for the other parts. Many matters were discussed in the group chat and were collaborated on by the whole team.

Q10. Comment on how well you managed your time over the time period allocated in the Course timetable to this team deliverable (i.e. the time between the prior team deliverable to this team deliverable).

I had some difficulties at the end of the sprint since I had 4 other projects due in the same week. Miscommunication with my group also caused me to miss a meeting. But we are caught up with each other's pace now.
